-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1712

Claims 3, 4, 8 and 9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the response filed March 2, 2004.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-7 and 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reh fuss (5,512,639) in view of Aarts (5,103,003). Reh fuss teaches coating compositions that comprise carbamate functional compounds that are the reaction product of a polyisocyanate and an hydroxy carbamate compound and compounds having groups that are reactive with carbamate groups such as aminoplast crosslinking agents. The compositions may be used as powder coating compositions. See col. 2, lines 56-64 and col. 3, lines 13-43. Aarts teaches oxazolidine blocked aminoplasts prepared from melamine and aldehyde that can be used as solid crosslinking agents in reactions without the formation of volatile formaldehyde. See col. 1, line 32 through col. 2, line 29. In view of Aarts, it would have been obvious to use a solid oxazolidine blocked aminoplast as the crosslinking agent in the powder coating compositions of Reh fuss, optionally in combination with other compounds having groups reactive with carbamate groups, in order to eliminate volatile formaldehyde formation.
